RICARDO JOSE C. DAVID

Software Engineer | Full Stack Web Developer | AI-Enthusiast

Apalit, Pampanga, Philippines (Willing to Relocate) | rjdavid.job@gmail.com | +63 912 899 7909

PROFESSIONAL SUMMARY

Information Technology graduate and Full Stack Web Developer with hands-on experience delivering production-ready systems using PHP/Laravel, ReactJS, and Node.js. Proven ability to lead projects end-to-end, having directed a cross-functional student team as Project Manager on a POS and inventory management system built for a live retail client. Skilled in REST API security, database design (MySQL, PostgreSQL, MongoDB), and Agile/Scrum delivery. Experienced in AI-assisted software development using GitHub Copilot, ChatGPT, and Claude for code generation, debugging, refactoring, documentation, technical research, and development workflow optimization. Foundational, hands-on exposure to Prompt Engineering, Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), vector databases, and other generative AI concepts. Seeking an entry-level Software Engineer, Full Stack Developer, or AI Engineer role where reliable, well-documented engineering and effective use of AI-assisted development can drive measurable business value.

TECHNICAL SKILLS

Programming Languages: JavaScript, PHP, Python, Java, C++, VB.NET, SQL, HTML, CSS

Frameworks & Libraries: ReactJS, Laravel, Node.js, Express.js, Bootstrap, Tailwind CSS

API Development: REST APIs, WebSocket

CMS & Website Development: WordPress, Elementor, Elementor Pro, Astra, Spectra

Databases: MySQL, PostgreSQL, MongoDB

AI & Machine Learning: Prompt Engineering, Generative AI Concepts, Agentic AI Fundamentals, Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Vector Databases (foundational), LLM Gateways, Guardrails & Evals (foundational)

AI Tooling: Github Copilot, ChatGPT, Claude — used for development workflow, code assistance, documentation, and integration debugging.

Security: Laravel Sanctum Authentication, Authentication & Authorization, OWASP Security Principles, Password Hashing (bcrypt), Input Validation, REST API Security

Networking: TCP/IP Fundamentals, IP Addressing & Subnetting, LAN/WAN Concepts, Network Troubleshooting

DevOps & Tools: Git, GitHub, Visual Studio Code, Postman

Methodologies & Practices: Agile/Scrum, Object-Oriented Programming (OOP), Functional Programming, MVC Design Pattern, Test-Driven Development (TDD)

PROFESSIONAL EXPERIENCE

IT On-the-Job Trainee — Department of Migrant Workers, Regional Office *March 2026 – June 2026*

- Designed and developed an Online Request Assistance System using PHP and Laravel, digitizing request submission and tracking for clients and staff and streamlining a previously manual, paper-based workflow.
- Diagnosed and resolved hardware and network issues across office systems through proactive troubleshooting, restoring reliable performance and reducing operational downtime for end users.

PROJECTS

InvenTrack — Web-Based POS with Inventory Management & Descriptive Analytics *Capstone Project*

Project Manager / Web Developer | Client: Realflooring Corp., Pampanga | Tech Stack: PHP, Laravel, MySQL, Figma

- Led a cross-functional student team through the full software development lifecycle, covering requirements gathering, system design, development, testing, and deployment, for a live retail client's point-of-sale and inventory platform.
- Coordinated project planning and stakeholder communication to keep deliverables on schedule, ensuring the on-time, successful completion of all project objectives.
- Built and maintained core POS and inventory management features, producing flowcharts, process diagrams, and technical documentation to guide development and support long-term maintainability.
- Conducted functional testing throughout the development cycle, delivering a reliable, well-documented system with descriptive analytics for data-driven inventory decisions.

IT Ticketing System — Web-Based IT Support & Ticket Management System

Web Developer | Tech Stack: Laravel, React, MySQL

- Developed a web-based IT ticketing system for managing technical support requests, enabling users to submit, track, and monitor the status of IT-related concerns.
- Implemented ticket management workflows that allowed IT personnel to review, prioritize, assign, update, and resolve support tickets efficiently.

- Designed a centralized system for organizing ticket information, user concerns, statuses, and resolution details, improving visibility and simplifying IT support operations.

Mitigation Men — Web-Based Platform for Mitigation & Restoration Services
Web Developer | Tech Stack: WordPress, Astra, Spectra

- Designed a responsive WordPress website using Astra and Spectra, giving a mitigation and restoration services company a professional online presence that clients could explore easily.
- Developed key site features, including a service showcase, company profile, and service request form, enabling clients to learn about offerings and request assistance directly online.
- Structured the site's navigation and page architecture (Home, About Us, Services & Area, Contact), improving customer engagement and streamlining service inquiries.

EDUCATION

Bachelor of Science in Information Technology, Magna Cum Laude *2022 – 2026*
Pampanga State University

Science, Technology, Engineering and Mathematics (STEM) Strand *2020 – 2022*
Assumpta Technical High School

CERTIFICATIONS

- Installing and Configuring Computer Systems
- Introduction to CSS
- Setting Up Computer Networks
- Emerging Trends in Information Technology Skills for the Future
